

Export to price comparison websites

User guide

1 - Formats management

The screenshot shows the top navigation bar of the Magento Admin Panel. The 'Format' menu item is highlighted with a yellow callout box that says 'First create your formats'. Below it, the 'Manage comparer' item is also highlighted with a yellow callout box that says 'Export formats management'. To the right, a white callout box points to the 'Format' menu item and says 'Products export file management'.

The screenshot shows the 'Format' management page in the Magento Admin Panel. At the top right, there is an orange button labeled '+ Add new format'. Below the navigation bar, there is a table with the following data:

ID	Name	Action
2	FormatName	Edit
4	test2	Edit

A yellow callout box labeled 'Create new format' points to the '+ Add new format' button.

The screenshot shows the 'New Format' configuration page. The 'Name' field contains 'myNewFormat'. The 'Header' field is empty. The 'Separator' field contains ';'. There are three callout boxes:

- A white callout box at the top right says: 'Some price comparison website needs special information in the csv file header'.
- A white callout box at the bottom right says: 'Separator for cvs, as \';''.
- A small grey callout box at the bottom right says: 'Use \t for tabulation'.

New Line

Max size of the field

Field's name in your csv file

You can add as many lines as needed

Here are some special objects.

- Current price is the price that customers can buy the product, at the date of the export (so including promotions)
- Normal price is the price without promotion

Magento products attributes

In edition mode, you can delete any format. But you have first to delete all the the exports configured that depend to this format

Edit Format 'FormatName'

Back Reset Delete-format Remove ALL exports using this format Save format

Mapping

CSV*	Attribute**	Default Value	Number max of char*	Sort Order*
description longue	description		150	0
description courte	short_description		120	0
name	name		0	1
price	current_price		0	2
devis	currency		0	2
img url	image_url		0	3
categorie	category		0	3
normal price	normal_price		0	3
produit url	product_url		0	4
id	sku		0	9

*If you choose "none", comparer get the default value. Or You can specify default value if
**If "Number max of char" equals 0, the value of column is not truncated

You can sort or delete your fields
