

Export to price comparison websites

User guide

1 - Formats management

The screenshot shows the Magento Admin Panel navigation menu. The 'Format' menu item is highlighted with a yellow callout box that says 'First create your formats'. The 'Manage comparer' menu item is also highlighted with a yellow callout box that says 'Export formats management'. A white callout box points to the 'Format' menu item with the text 'Products export file management'.

The screenshot shows the 'Format' management page in the Magento Admin Panel. The 'Add new format' button is highlighted with a yellow callout box that says 'Create new format'. Below the button is a table with the following data:

ID	Name	Action
2	FormatName	Edit
4	test2	Edit

The screenshot shows the 'New Format' form in the Magento Admin Panel. The form has the following fields:

- Name: myNewFormat
- Header:
- Separator: ;

There are three callout boxes:

- A white callout box pointing to the Header field with the text: 'Some price comparison website needs special information in the csv file header'. Below this text is the example: 'ex, kelkoo use #type=basic'.
- A white callout box pointing to the Separator field with the text: 'Separator for cvs, as \';''. Below this text is the note: 'Use \t for tabulation'.
- A white callout box pointing to the Separator field with the text: 'Separator for cvs, as \';''.

^{**}If you choose "none", comparer get the default value. Or You can specify default value if the value of attribute is empty

^{**}If "Number max of char" equals 0, the value of column is not truncated

New Line

Max size of the field

Field's name in your csv file

You can add as many lines as needed

Here are some special objects.

- Current price is the price that customers can buy the product, at the date of the export (so including promotions)
- Normal price is the price without promotion

Magento products attributes

In edition mode, you can delete any format. But you have first to delete all the the exports configured that depend to this format

Edit Format 'FormatName'

2 - Exports management

Create your exports

The screenshot shows the 'Shopbots' section of the Magento Admin Panel. A yellow callout box with the text 'Add one export' points to the '+ Add New Export' button. Below the button is a table listing available exports. A white callout box with the text 'Available exports list' points to the table. The table has columns for 'Format', 'Name', 'Updated At', 'Csv', 'Store View', and 'Action'. A single record is visible with the following details:

Format	Name	Updated At	Csv	Store View	Action
FormatName	testfp2	2009-11-24 21:11:53	TESTFP2-MAXICOMMERCE-EN-FORMATNAME.csv	Main Website Maxicommerce English	Edit Regenerate Csv(6)

Add one export

Available exports list

Direct download link

The csv file is also automatically put in the 'YourSite.com/comparateur/' directory, to be picked up by the shopbot.

'One click' datas update.

Export Settings
